

Canadian Task Force on Preventive Health Care

Disclosure Form

Preamble:

The Canadian Task Force on Preventive Health Care (Task Force) Disclosure Form will be completed by Task Force members prior to each in-person meeting to provide information on **financial, business/professional, and intellectual interests related to the topics addressed that could potentially be construed or seen as giving rise to conflicts of interest (COI)**.

Task Force members are expected to provide full disclosure for new topics, and an updated disclosure, reflecting changes in their situation since the form was last completed, for continuing topics.

Task Force Disclosure Form will also be completed by new Task Force members prior to their participation. Completed Disclosure Forms will be kept on file by the Project Lead and posted on the Task Force website.

The declaration of one or more interests will not be taken to indicate that a real or potential COI is present. The Task Force will carry out an evaluation of declared interests to determine whether or not they represent a COI. **To facilitate assessment of the interests for COI, for each entry, please include a brief explanation of the relevance of the declared interest to the guideline topic and why it could be construed or seen as giving rise to COI.**

Name: Ahmed Abou-Setta

I have reviewed my current activities and those of the past 3 years for interests that could potentially be construed or seen as giving rise to COI, or that could otherwise impair the scientific integrity of the work of the Canadian Task Force on Preventive Health Care, particularly as they relate to the attached Affiliations and Interests Checklist, including financial and/or intellectual affiliations or memberships in associations, research funding, payments, gifts, gratuities, honoraria, advocacy, consulting or other conflicts

I have also considered the activities of my spouse/common-law partner and immediate family members insofar as they could be viewed to affect my impartiality.

I would like to bring the following to the attention of other members of the Canadian Task Force on Preventive Health Care (check appropriate box and provide details, including a brief explanation of the relevance of the interest to the topic and why it could be construed or seen as giving rise to COI, below):

Guideline	Financial	Intellectual	Affiliations/ Memberships	Research Funding	Payments /Gifts	Advocacy	Consulting	Others

Falls Prevention								
Hepatitis C update								
Hypertension Update								
Lung Cancer							x	
Opioids								
Polypharmacy (Potentially Inappropriate Prescribing)								
Prostate Cancer							x	
Tobacco – Adults		x					x	
Vitamin D and Calcium								

Details:

In 2017-2018, through a numbered corporation that I own, I have provided consultations to Medlior Health Outcomes Research Ltd (Medlior) related to the methodological rigor on protocols and systematic reviews they were conducting. The patient population of one of the projects I consulted on was **cervical cancer**. I should note that I was never directly affiliated nor contracted by any pharmaceutical or device companies during this time, and all payments were for consulting services to Medlior.

In 2018-2019, I was the assigned editor for protocols of systematic reviews and completed reviews conducted for the CTPHC and published at the journal 'Systematic Reviews'. As such, I have had insight and provided feedback on the following protocol: Screening for **depression** in women during pregnancy or the first-year postpartum and in the general adult population: a protocol for two systematic reviews to update a guideline of the Canadian Task Force on Preventive Health Care.

In 2018-2019, I was the assigned editor for protocols of systematic reviews and completed reviews conducted for the CTPHC and published at the journal 'Systematic Reviews'. As such, I have had insight and provided feedback on the following protocol: Screening to Prevent **Fragility Fractures** Among Adults 40 Years and Older in Primary Care: Protocol for a Systematic Review.

In 2017-2018, through a numbered corporation that I own, I have provided consultations to Medlior Health Outcomes Research Ltd (Medlior) related to the methodological rigor on protocols and systematic reviews they were conducting. The patient population of one of the projects I consulted on was **lung cancer**. I should note that I was never directly affiliated nor contracted by any pharmaceutical or device companies during this time, and all payments were for consulting services to Medlior.

In 2017-2018, through a numbered corporation that I own, I have provided consultations to Medlior Health Outcomes Research Ltd (Medlior) related to the methodological rigor on protocols and systematic reviews they were conducting. The patient population of one of the projects I consulted on was **prostate cancer**. I should note that I was never directly affiliated nor contracted by any pharmaceutical or device companies during this time, and all payments were for consulting services to Medlior.

In 2017-2018, through a numbered corporation that I own, I have provided consultations to Medlior Health Outcomes Research Ltd (Medlior) related to the methodological rigor on protocols and systematic reviews they were conducting. The patient population of one of the projects I consulted on was **smoking cessation** for patients diagnosed with cancer. I should note that I was never directly affiliated nor contracted by any pharmaceutical or device companies during this time, and all payments were for consulting services to Medlior.

In 2018-2019, I was the assigned editor for protocols of systematic reviews and completed reviews conducted for the CTPHC and published at the journal 'Systematic Reviews'. As such, I have had insight and provided feedback on the following protocol: Effectiveness of **stop smoking interventions** among adults: protocol for an overview of systematic reviews and an updated systematic review.
